SONDIP KUMAR

Fullstack Developer

Dhaka, Bangladesh | +8801774032681 | sondipkumarsk@gmail.com | linkedin.com/in/sondip-kumar
github.com/iamsondev | sondip-kumar.vercel.app

SUMMARY

Fullstack Developer building production apps with React.js, Next.js, Node.js, PostgreSQL, and MongoDB, plus Stripe and Groq AI. Delivered 20% faster data retrieval, 0% unauthorized access, and 25% faster asset loads.

WORK EXPERIENCE

MERN Stack Developer (Intern) — The Entrepreneurship Network (Limitless Technologies LLP) **Jun 2026 – Sep 2026**

- Independently built a full-stack app (React.js, Node.js, Express.js, MongoDB) as an npm workspaces monorepo.
- Secured accounts with bcryptjs, JWT, and Google sign-in; created the admin account via a seed script.
- Validated input with React Hook Form, Zod, and express-validator, and integrated Stripe for online payments.

SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL
Frontend: React.js, Next.js, React Router, Tailwind CSS, Redux, Zustand, Shadcn UI, React Hook Form, Zod
Backend: Node.js, Express.js, REST APIs, express-validator, Socket.IO, WebSocket
Databases: PostgreSQL, Prisma ORM, MongoDB, Mongoose
Auth, Payments & AI: JWT, RBAC, bcrypt, Google OAuth, Better Auth, Firebase Auth, Stripe, Groq SDK
Tools & Deployment: Git, GitHub, Vite, npm Workspaces, Vercel, Netlify, Cloudinary, GSAP, Framer Motion

PROJECTS

GreenVaya — Full Stack SaaS Funding Platform **March 2026 – Apr 2026**

Next.js, Node.js, Express.js, PostgreSQL, Prisma ORM, JWT, Stripe

Live: greenvayaclient.vercel.app | Frontend: github.com/iamsondev/greenvaya client | Backend: github.com/iamsondev/greenvaya backend

- Solved the problem of letting users safely share ideas and request funding in one place by building a scalable SaaS-style platform with a role-based system (Admin and Member).
- Eliminated unauthorized access (0% incidents) by enforcing JWT-based authentication and role-based authorization, so every user can only perform actions allowed for their role.
- Fixed slow image loading by managing media through Cloudinary and optimizing database queries, improving asset load speed by 25%; enabled secure online funding with Stripe.

MediStore — Full Stack E-Commerce & Business Automation Platform **Feb 2026 – March 2026**

Next.js, PostgreSQL, Prisma ORM, Better Auth, Stripe

Live: medistore-client-bice.vercel.app | Frontend: github.com/iamsondev/mdeistore-client | Backend: github.com/iamsondev/medistore-server

- Solved the challenge of managing orders, delivery, and moderation on one platform by building an e-commerce and business automation system with role-based access for Admin, Customer, Delivery Agent, and Moderator.
- Secured user accounts and sessions by implementing Google OAuth and Better Auth, giving users a safe, quick sign-in and stronger session security.
- Gave customers instant answers to product questions by integrating an AI chatbot with the Groq SDK, delivering fast, low-latency responses.

Pawlume — MERN Stack Pet Adoption & E-Commerce Platform **Jan 2025 – Jun 2025**

React.js, Node.js, MongoDB, Firebase, Stripe

Live: pawlume-pet-adoptation.netlify.app | Frontend: github.com/iamsondev/palume client | Backend: github.com/iamsondev/pawlume-server

- Solved the problem of finding and listing pets for adoption in one place by building a production-ready full-stack platform with real-time data management.
- Prevented unauthorized actions by implementing Firebase Authentication with role-based access control, tested with 100+ simulated users.
- Fixed slow data retrieval by designing and optimizing a RESTful API with Node.js, Express.js, and MongoDB, boosting retrieval efficiency by 20%.

COURSES & CERTIFICATIONS

- Next Level AI-Driven Software Engineering Bootcamp – Programming Hero Certified
- Complete Web Development Course – Programming Hero Certified
